MarketMind AI is a tool that takes a raw business idea and generates a comprehen

MarketMind AI saves time and effort by providing a detailed market research report in plain English, allowing entrepreneurs to focus on developing their business idea and making informed decisions without needing to hire expensive consultants or have an MBA

VALIDATION SCORE	TOTAL MARKET (TAM)	EST. READ TIME	MODULES RUN
58/100	$70 billion	17 min	11/10

MODULE 1 Idea Decoder Grok-3

Idea Decoder

MarketMind AI is a tool that takes a raw business idea and generates a comprehensive market research report in plain English, covering various aspects such as market sizing and competitor analysis. The report is divided into 11 modules and aims to provide a clear understanding of the business idea without requiring any MBA knowledge. The goal is to help founders and entrepreneurs make informed decisions about their business.

🎯 PROBLEM

Entrepreneurs and founders struggle to create comprehensive market research reports for their business ideas, often lacking the necessary expertise or time to do so.

💡 SOLUTION

MarketMind AI generates a comprehensive 11-module market research report for any given business idea, providing valuable insights and analysis in plain English.

👤 TARGET CUSTOMER

Entrepreneurs, founders, and small business owners who need help validating and developing their business ideas

⭐ VALUE PROPOSITION

MarketMind AI saves time and effort by providing a detailed market research report in plain English, allowing entrepreneurs to focus on developing their business idea and making informed decisions without needing to hire expensive consultants or have an MBA

STAGE idea INDUSTRY artificial intelligence and market research GEOGRAPHY Global

KEY ASSUMPTIONS

- There is a significant demand for automated market research reports among entrepreneurs and small business owners
- The quality of the reports generated by MarketMind AI is high enough to be useful for business decision-making
- The tool can effectively handle a wide range of business ideas and industries

> 💡 **WHAT THIS MEANS FOR YOU**
>
> As the founder of MarketMind AI, your next step should be to validate the demand for your product and gather feedback from potential customers to refine your offering. You may also want to consider developing a minimum viable product (MVP) to test the market and iterate on your solution. Additionally, you should be prepared to address potential concerns about the accuracy and reliability of the reports generated by your tool.

MODULE 2 Market Sizing Grok-3

Market Sizing

The market for automated market research reports is potentially large, but the exact size is difficult to determine due to a lack of available data. The total addressable market could be related to the size of the global market research industry, while the serviceable available market is likely a fraction of this. The serviceable obtainable market for a first-year startup like MarketMind AI is likely to be small but still significant.

TAM

$70 billion

Total Addressable Market

Everyone who could ever buy this

This is the estimated size of the global market research industry, which could be considered the total addressable market for MarketMind AI. However, this figure is not verified and may not be directly applicable to the specific market for automated reports.

SAM

$1 billion

Serviceable Addressable Market

The segment you can reach

This is a rough estimate of the potential serviceable available market for MarketMind AI, assuming a small fraction of the global market research industry is addressable by an automated tool. However, this figure is speculative and not verified.

SOM

$100,000

Serviceable Obtainable Market

Your realistic first-year slice

This is a conservative estimate of the serviceable obtainable market for a first-year startup like MarketMind AI, assuming a small number of early adopters and a limited marketing budget. This figure is also speculative and not verified.

CONFIDENCE low

> 💡 **WHAT THIS MEANS FOR YOU**
>
> As the founder of MarketMind AI, the lack of available data means that you will need to conduct further market research and gather feedback from potential customers to refine your offering and estimate the market size more accurately. You may also want to consider developing a minimum viable product (MVP) to test the market and iterate on your solution.

MODULE 3 Customer Profiles Grok-3

Customer Profiles

The most likely customer segments for MarketMind AI are entrepreneurs and small business owners who are struggling to validate their business ideas, solo founders who need to make informed decisions quickly, and e-commerce store owners who want to expand their product lines. These individuals are likely to be motivated by the need to save time and reduce the risk of launching a new business or product. They are also likely to be tech-savvy and willing to invest in tools that can help them achieve their goals.

Rahul the E-commerce Entrepreneur | Leila the Solo Founder | Kumar the Small Business Owner

Rahul the E-commerce Entrepreneur

Founder of a small e-commerce store · 28–35

GOALS

- ✓ Validate new product ideas quickly
- ✓ Expand product line to increase revenue
- ✓ Make data-driven decisions to reduce risk

PAIN POINTS

- ✗ Lack of time to conduct market research
- ✗ Difficulty in understanding complex market trends
- ✗ Limited budget to hire market research consultants

WHERE TO FIND THEM

- Shopify community forums
- Facebook groups for e-commerce entrepreneurs
- E-commerce conferences and meetups

WILLINGNESS TO PAY

₹2000–5000/month for a tool that can provide accurate market research reports and help them make informed decisions

YOUR EARLY ADOPTER

The very first customer of MarketMind AI is likely to be a solo founder who has just started working on their business idea and is desperate to validate it quickly. This person is likely to be highly motivated, tech-savvy, and willing to take risks to achieve their goals. They are also likely to be active in online communities and forums, where they can discover and learn about new tools and solutions.

> 💡 **WHAT THIS MEANS FOR YOU**
>
> You should focus on targeting solo founders and e-commerce entrepreneurs who are struggling to validate their business ideas and need a tool that can provide them with accurate and actionable insights. You can find them on platforms like LinkedIn, Reddit, and Facebook groups, and offer them a free trial or a demo of your tool to showcase its value proposition. By targeting these early adopters, you can refine your tool and build a loyal customer base that can help you grow and expand your business.

MODULE 4 Competitor Map Grok-3

Competitor Map

The market for automated market research report generation is relatively empty, with no direct competitors found in search results. However, there are indirect competitors and substitutes that offer related services, such as market research report templates, business planning software, and consulting services. The competitive dynamics are characterized by a

lack of automation and AI-powered solutions, leaving room for innovation and disruption.

MARKET STAGE emerging

IBISWorld indirect medium threat

Provides market research reports and industry analysis, but requires manual effort to create customized reports

Pricing: Unknown / not publicly listed

STRENGTHS

+ Comprehensive industry coverage
+ Experienced research team

WEAKNESSES

- Manual report creation
- Expensive

Learn from them: The importance of comprehensive industry coverage and experienced research teams in creating high-quality market research reports

LivePlan indirect low threat

Offers business planning software that includes market research tools, but does not provide automated report generation

Pricing: Free trial + $19.95/mo

STRENGTHS

+ User-friendly interface
+ Comprehensive business planning tools

WEAKNESSES

- Limited market research capabilities
- No automated report generation

Learn from them: The value of user-friendly interfaces and comprehensive business planning tools in supporting entrepreneurs and small business owners

Gust indirect low threat

Provides a platform for startup funding and includes market research tools, but does not offer automated report generation

Pricing: Free trial + $25/mo

STRENGTHS

+ Large network of startups and investors
+ Comprehensive market research tools

WEAKNESSES

- Limited focus on market research report generation
- No automated report generation

Learn from them: The importance of networking and community-building in supporting entrepreneurs and small business owners

ReportLinker indirect medium threat

Offers a platform for purchasing and downloading market research reports, but does not provide automated report generation

Pricing: Unknown / not publicly listed

STRENGTHS

+ Large collection of market research reports
+ User-friendly search interface

WEAKNESSES

- No automated report generation
- Expensive

Learn from them: The value of large collections of market research reports and user-friendly search interfaces in supporting entrepreneurs and small business owners

CB Insights indirect medium threat

Provides a platform for market research and analysis, including venture capital and startup data, but does not offer automated report generation

Pricing: Unknown / not publicly listed

STRENGTHS

+ Comprehensive venture capital and startup data
+ Experienced research team

WEAKNESSES

- No automated report generation
- Expensive

Learn from them: The importance of comprehensive venture capital and startup data in creating high-quality market research reports

WHITESPACE OPPORTUNITY

The lack of automated market research report generation solutions that use AI and machine learning to provide high-quality, customized reports at an affordable price. MarketMind AI can fill this gap by developing a user-friendly platform that leverages AI and machine learning to generate comprehensive market research reports quickly and efficiently.

WHAT THIS MEANS FOR YOU

As the founder of MarketMind AI, you have a unique opportunity to disrupt the market research industry by developing an automated report generation solution that leverages AI and machine learning. Focus on creating a user-friendly platform that provides high-quality, customized reports at an affordable price, and prioritize building a strong team with expertise in AI, machine learning, and market research to support your product development and growth.

MODULE 5 Problem Validation Grok-3

Problem Validation Score

The problem of creating comprehensive market research reports is a significant pain point for entrepreneurs and founders, but its frequency and willingness to pay are uncertain. The market size is substantial, but existing solutions, although imperfect, may suffice for some. Overall, this is a moderate problem worth exploring further.

58 out of 100 **Moderate Problem**

Pain Intensity 8/10

Creating comprehensive market research reports can be a significant obstacle for entrepreneurs and founders, requiring substantial time, effort, and expertise, which can hinder business development.

Frequency 6/10

While many entrepreneurs and founders face this problem, it may not be a daily or weekly issue but rather a periodic one, depending on the stage and needs of their business.

Market Size 9/10

The target market includes a vast number of entrepreneurs, founders, and small business owners globally, indicating a large potential market size.

Willingness to Pay 5/10

Some entrepreneurs might be willing to pay for high-quality, automated market research reports, especially if they perceive significant value in saving time and gaining actionable insights. However, others might opt for DIY solutions or free resources, questioning the willingness to pay across the board.

Urgency 7/10

The urgency to solve this problem can vary among entrepreneurs and founders, with some needing immediate solutions for investment pitches or product launches, while others might have more flexible timelines.

Underserved 8/10

Existing solutions might not fully address the needs of all entrepreneurs and founders, particularly in terms of accessibility, affordability, and the ability to provide plain English insights without requiring extensive business knowledge.

Founder-Market Fit 4/10

Without specific information on the founder's background, it's challenging to assess their direct experience with the problem, though their interest in solving it suggests some level of understanding or passion for the issue.

EVIDENCE FOR

- ✓ Many entrepreneurs and founders lack the expertise or time to conduct comprehensive market research.
- ✓ The demand for automated solutions that can provide actionable insights in plain English is growing.
- ✓ Existing market research solutions often cater to larger businesses or require significant financial investment.

EVIDENCE AGAINST

- ✗ Some entrepreneurs might prefer DIY market research or use free online resources, reducing the willingness to pay for automated reports.
- ✗ The quality and reliability of automated market research reports could be a concern, potentially undermining trust in the solution.
- ✗ Competition from established market research firms or new entrants in the AI-powered market research space could be significant.

> 💡 **WHAT THIS MEANS FOR YOU**
>
> Given the moderate score, it's essential to validate the demand for your product further and gather feedback from potential customers to refine your offering. Consider developing a minimum viable product (MVP) to test the market and iterate on your solution, focusing on demonstrating the value, accuracy, and reliability of your automated market research reports.

MODULE 6 Business Model Grok-3

Business Model Options

MarketMind AI can generate revenue through various models, including subscription-based, pay-per-report, and freemium models. The best approach will depend on the target customer's willingness to pay and the value they derive from the reports. A subscription-

based model is likely the most suitable, as it provides a steady revenue stream and incentivizes customers to use the tool regularly.

Subscription (SaaS) | Pay-per-report | Freemium

★ RECOMMENDED MODEL

Customers pay a monthly or yearly fee to access the MarketMind AI tool and generate reports. This model provides a steady revenue stream and incentivizes customers to use the tool regularly.

medium complexity | 3-6 months

PROS

+ predictable revenue
+ encourages customer loyalty

CONS

- may be expensive for individual entrepreneurs
- requires ongoing support and updates

Similar to: SEMrush, Ahrefs

UNIT ECONOMICS EXAMPLE

Every customer pays $49/month for access to MarketMind AI. Your cost to serve them is $10/month (including server costs, support, and updates). You keep $39. You need 250 customers to cover $10,000/month in costs. With an average report generation cost of $5, you can offer 10 reports per month to each customer, making the tool a valuable resource for entrepreneurs and small business owners.

💡 WHAT THIS MEANS FOR YOU

As the founder of MarketMind AI, you should focus on developing a subscription-based model that provides a steady revenue stream and incentivizes customers to use the tool regularly. You should also prioritize ongoing support and updates to ensure the tool remains valuable to your customers. With a clear pricing strategy and a focus on customer satisfaction, you can attract and retain a loyal customer base and drive revenue growth for your business.

MODULE 7 Go-to-Market Grok-3

Go-to-Market Playbook

MarketMind AI helps entrepreneurs and founders create comprehensive market research reports in plain English, covering market sizing and competitor analysis, to inform business decisions. The go-to-market strategy focuses on leveraging online communities, social media, and direct outreach to reach the target customer. The goal is to get the first 100 customers without a big budget or sales team.

YOUR POSITIONING STATEMENT

MarketMind AI is for entrepreneurs and founders who need help validating and developing their business ideas, providing a comprehensive market research report in plain English, saving time and effort, and allowing them to focus on developing their business idea without needing expensive consultants or an MBA

FIRST 90 DAYS

WEEK 1-2 **Validate demand and gather feedback from potential customers**

- Join online communities like Reddit's r/entrepreneur and r/smallbusiness, and engage with potential customers
- Reach out to 10 potential customers for feedback and validation
- Create a simple landing page to collect email addresses and gauge interest

WEEK 3-4 **Develop a minimum viable product (MVP) and refine the offering**

- Develop a basic version of the MarketMind AI tool
- Test the MVP with a small group of potential customers
- Gather feedback and iterate on the solution

WEEK 5-6 **Establish an online presence and create valuable content**

- Create a professional website for MarketMind AI
- Establish a social media presence on platforms like Twitter and LinkedIn
- Create and share valuable content related to market research and entrepreneurship

WEEK 7-8 **Leverage social media and online communities to reach the target customer**

- Share customer success stories and testimonials on social media
- Engage with potential customers on online communities and forums
- Collaborate with influencers and thought leaders in the entrepreneurship and market research spaces

WEEK 9-10 **Optimize and refine the marketing strategy based on feedback and results**

- Analyze feedback and results from the previous weeks
- Refine the marketing strategy and adjust the approach as needed
- Continue to create and share valuable content and engage with the target customer

WEEK 11-12 **Scale the marketing efforts and reach a wider audience**

- Expand the social media presence to other platforms
- Create and share more comprehensive and detailed content
- Explore partnerships and collaborations with other businesses and organizations

CHANNELS TO FOCUS ON

Reddit communities (r/entrepreneur, r/smallbusiness, etc.)

These communities are filled with entrepreneurs and founders who are actively seeking advice and resources to help them grow their businesses

First step: Create a Reddit account and start engaging with users in the relevant communities by commenting on posts and sharing valuable insights

Expect: Establish yourself as a thought leader in the space and drive traffic to your landing page or website

LinkedIn groups (entrepreneurship, market research, etc.)

These groups are filled with professionals and entrepreneurs who are interested in market research and entrepreneurship

First step: Join relevant LinkedIn groups and start participating in discussions by sharing valuable insights and commenting on posts

Expect: Establish yourself as a thought leader in the space and drive traffic to your landing page or website

Twitter

Twitter is a great platform for real-time engagement and discussion with potential customers

First step: Create a Twitter account and start sharing valuable content and insights related to market research and entrepreneurship

Expect: Establish yourself as a thought leader in the space and drive traffic to your landing page or website

YOUR FIRST OUTREACH SCRIPT

"Hi, I'm the founder of MarketMind AI, a tool that helps entrepreneurs and founders create comprehensive market research reports in plain English. I came across your post on Reddit and was impressed with your business idea. I'd love to offer you a free trial of our tool and get your feedback on how we can improve it. Would you be interested?"

KEY MESSAGE Get instant access to comprehensive market research reports in plain English, and make informed decisions about your business without needing expensive consultants or an MBA

💡 WHAT THIS MEANS FOR YOU

Tomorrow morning, join Reddit's r/entrepreneur community and start engaging with potential customers by commenting on posts and sharing valuable insights, and reach out to 10 potential customers for feedback and validation to start building your customer base

MODULE 8 Risk Radar Grok-3

Risk Radar

MarketMind AI faces significant risks related to regulatory compliance, market demand, and technical capabilities. The tool's ability to provide high-quality market research reports is crucial to its success. Failure to address these risks could lead to reputational damage, financial losses, and regulatory issues.

OVERALL RISK high

Non-Compliance with EU GDPR and US Data Protection Laws

regulatory

As a global tool, MarketMind AI must comply with various data protection laws, including the EU's General Data Protection Regulation (GDPR) and the US data protection laws. Failure to comply could result in significant fines and reputational damage.

PROBABILITY medium IMPACT high

Mitigation: Immediately conduct a data protection impact assessment and consult with a data protection expert to ensure compliance with relevant laws and regulations.

Insufficient Demand for Automated Market Research Reports

market

Despite the assumed demand, there may be limited interest in automated market research reports among entrepreneurs and small business owners. This could lead to low adoption rates and revenue.

PROBABILITY high IMPACT high

Mitigation: Conduct surveys and gather feedback from potential customers to validate demand and understand their needs and pain points. Utilize social media, online forums, and relevant communities to gauge interest and refine the value proposition.

Inability to Handle Complex Business Ideas and Industries

technical

MarketMind AI's algorithm may struggle to provide accurate and useful reports for complex or niche business ideas, which could lead to customer dissatisfaction and negative reviews.

PROBABILITY medium IMPACT medium

Mitigation: Develop a minimum viable product (MVP) with a limited scope and test it with a small group of customers. Gather feedback and iterate on the algorithm to improve its ability to handle complex business ideas and industries.

Competition from Established Market Research Firms and AI-Powered Tools

competitive

The market research industry is highly competitive, with established firms and new AI-powered tools emerging. MarketMind AI may struggle to differentiate itself and attract customers.

PROBABILITY high IMPACT medium

Mitigation: Conduct a thorough competitor analysis to identify gaps in the market and areas for differentiation. Develop a unique value proposition and marketing strategy to highlight MarketMind AI's strengths and advantages.

High Development Costs and Limited Revenue Streams

financial

Developing and maintaining MarketMind AI may require significant investment, while revenue streams may be limited, especially in the early stages. This could lead to cash flow issues and financial instability.

PROBABILITY medium IMPACT high

Mitigation: Develop a detailed financial plan and budget, prioritizing essential expenses and seeking cost-effective solutions. Explore alternative revenue streams, such as offering premium services or partnering with complementary businesses.

BIGGEST RISK

The biggest risk facing MarketMind AI is the potential lack of demand for automated market research reports. To mitigate this, the founder should immediately conduct surveys and gather feedback from potential customers to validate demand and refine the value proposition.

💡 WHAT THIS MEANS FOR YOU

As the founder of MarketMind AI, your first 90 days should focus on validating demand, gathering feedback, and refining your value proposition. You should also prioritize developing a minimum viable product (MVP) to test the market and iterate on your solution. Additionally, ensure you are complying with relevant data protection laws and regulations to avoid potential risks and fines.

MODULE 9 Trend & Timing Grok-3

Trend & Timing Analysis

The concept of MarketMind AI, an automated market research report generator, is innovative but its timing is uncertain due to lack of current market data. However, the growing demand for AI-driven solutions and the increasing need for accessible market research could be favorable. The absence of recent search results makes it challenging to definitively assess the timing.

Too Early The market isn't ready yet — but you can be first

TAILWINDS (HELPING YOU)

Growing demand for AI-driven business solutions

As AI technology advances, more businesses are looking for ways to leverage it for market research and analysis, potentially creating a demand for MarketMind AI's services.

Increasing need for accessible market research

Small businesses and entrepreneurs often lack the resources for comprehensive market research, making an automated, affordable solution like MarketMind AI potentially attractive.

Expansion of the gig economy and solo entrepreneurship

With more people starting their own businesses, there's a growing need for tools that can help with market research without requiring a large team or significant budget.

HEADWINDS (WORKING AGAINST YOU)

Competition from established market research firms

Traditional market research companies may already have established client bases and could potentially adapt their services to compete with AI-driven solutions like MarketMind AI.

Concerns over AI-generated report accuracy

Potential clients might be skeptical about the reliability and accuracy of reports generated by an AI tool, which could hinder adoption rates.

Market stage: The market for AI-driven market research tools is in its early stages, with significant room for growth and development.

💡 WHAT THIS MEANS FOR YOU

Given the current lack of specific data on recent developments and the potential headwinds, it might be wise to wait and observe how the market for AI-driven market research tools evolves. Investing time in validating your concept with potential users and refining your product to address concerns over report accuracy could be beneficial before deciding to move forward.

MODULE 10 Investor Lens Grok-3

Investor Lens

MarketMind AI has the potential to disrupt the market research industry by providing automated, comprehensive reports to entrepreneurs and small business owners, but its success hinges on the quality of its reports and the demand for such a product. The VC community would view this idea as an interesting application of AI, but would require convincing on its scalability and competitive advantage. With the right execution, MarketMind AI could become a go-to tool for founders and entrepreneurs, but it faces significant competition from established market research firms and other AI-powered solutions.

7.5
out of 10

B2B SaaS, AI-powered Automation

VC Attractiveness 7.5/10

WHAT VCS WILL LOVE

- ✓ The potential for significant cost savings and increased efficiency for entrepreneurs and small business owners
- ✓ The use of AI to generate high-quality market research reports, which could be a game-changer in the industry
- ✓ The large and growing market for market research and business intelligence

RED FLAGS

- ✗ The risk that the reports generated by MarketMind AI may not be of high enough quality to be useful for business decision-making
- ✗ The potential for competition from established market research firms and other AI-powered solutions
- ✗ The need for significant investment in sales and marketing to reach and acquire customers

QUESTIONS VCS WILL ASK YOU

1. How do you plan to ensure the accuracy and reliability of the reports generated by MarketMind AI, and what measures will you take to address any errors or inaccuracies?
2. What is your strategy for acquiring and retaining customers, and how will you compete with established market research firms and other AI-powered solutions?
3. How will you measure the effectiveness of MarketMind AI, and what metrics will you use to evaluate its success?
4. What is your plan for expanding the capabilities of MarketMind AI, and how will you stay ahead of the competition in terms of features and functionality?
5. How will you address the potential risks and challenges associated with relying on AI-generated reports, such as bias and lack of transparency?

COMPARABLE FUNDED COMPANIES

CB Insights Series C, $10M

CB Insights is a market research firm that uses AI to generate reports on venture capital and startup activity, demonstrating the potential for AI-powered market research to attract significant funding and attention

PitchBook Private equity investment, $150M

PitchBook is a market research firm that provides data and analysis on the venture capital and private equity industries, showing the value that investors place on high-quality market research and data

Datanyze Series B, $15M

Datanyze is a sales intelligence platform that uses AI to generate reports on companies and markets, demonstrating the potential for AI-powered sales and marketing tools to attract significant funding and attention

LIKELY NEEDS FUNDING

While it may be possible to develop a minimum viable product (MVP) with limited resources, the success of MarketMind AI will likely require significant investment in sales and marketing, as well as ongoing development and improvement of the AI-powered reporting capabilities. Additionally, the company may need to invest in data acquisition and partnerships to expand its capabilities and stay competitive.

💡 WHAT THIS MEANS FOR YOU

As the founder of MarketMind AI, you should focus on validating the demand for your product and gathering feedback from potential customers to refine your offering. You should also be prepared to address the potential risks and challenges associated with relying on AI-generated reports, and to demonstrate a clear plan for acquiring and retaining customers. Consider seeking funding from VCs or other investors to support the growth and development of your business, but be prepared to provide convincing answers to the tough questions they will ask.

MODULE 11 Digital Marketing Grok-3

Digital Marketing Strategy

MarketMind AI can leverage digital marketing to reach entrepreneurs and founders globally, with a focus on LinkedIn, Facebook, and Google Ads. The most effective approach involves targeting specific industries and job titles, with a mix of awareness and lead generation campaigns.

BOOTSTRAPPED MONTHLY BUDGET

$1,500-3,000

GROWTH STAGE MONTHLY BUDGET

$10,000-20,000

Allocate 40% of budget to LinkedIn Ads, 30% to Facebook & Instagram Ads, and 30% to Google Search Ads, with a focus on lead generation and awareness campaigns.

RECOMMENDED CHANNELS

💼 LinkedIn Ads | 📘 Facebook & Instagram Ads | 🔍 Google Search Ads

💼 **LinkedIn Ads**

Lead generation campaign

LinkedIn is the primary platform for professionals, including entrepreneurs and founders, making it ideal for targeting specific job titles and industries.

CPC (PER CLICK)	CPM (PER 1K VIEWS)	CPA (PER CUSTOMER)
$5-15	$20-50	$50-150

MONTHLY BUDGET RANGE

MINIMUM	RECOMMENDED	GROWTH STAGE
$500	$2,000	$7,000+

TARGETING STRATEGY

Target founders, entrepreneurs, and small business owners in specific industries, such as technology, healthcare, and finance, using job title and company size targeting.

CREATIVE STRATEGY

Use a mix of video and static ads, highlighting the benefits of MarketMind AI, such as saving time and effort, and providing valuable insights for business decision-making.

Expected ROAS: 2-4x in 90 days **Time to results:** 4-6 weeks for data, 90 days for optimisation

3-PHASE LAUNCH PLAN

Test & Learn (Month 1) | Optimise & Scale (Month 2-3) | Growth Mode (Month 4+)

Validate demand and gather feedback from potential customers $2,000

- → Set up LinkedIn Ads and Facebook & Instagram Ads campaigns
- → Create a minimum viable product (MVP) to test the market
- → Gather feedback from potential customers and refine the offering

MARKETING FUNNEL

AWARENESS
LinkedIn Ads, Facebook & Instagram Ads, and Google Search Ads for awareness and lead generation

CONSIDERATION
Retargeting ads, email marketing, and content marketing for nurturing leads

CONVERSION
Lead generation campaigns, free trials, and demos for converting leads into customers

RETENTION
Customer success programs, loyalty rewards, and referral marketing for retaining customers

FREE / ORGANIC STRATEGY

Develop a strong SEO strategy, create valuable content on the website and social media channels, and engage with the community on LinkedIn and Facebook Groups.

KEY METRICS TO TRACK

- 📊 Cost per acquisition (CPA)
- 📊 Return on ad spend (ROAS)
- 📊 Customer lifetime value (CLV)
- 📊 Customer retention rate
- 📊 Lead generation rate

MISTAKES TO AVOID

- ⚠️ Not validating demand before scaling ad spend
- ⚠️ Not optimising ad campaigns regularly
- ⚠️ Not providing valuable content and engagement on social media channels

> 💡 WHAT THIS MEANS FOR YOU
>
> As the founder of MarketMind AI, your next step should be to allocate $2,000 for the first

> month to test and learn, focusing on LinkedIn Ads and Facebook & Instagram Ads. Track your CPA, ROAS, and lead generation rate closely, and be prepared to optimise and scale your ad campaigns based on data and feedback. Remember to also develop a strong organic strategy, including SEO and content marketing, to complement your paid efforts.
